

TERMAL
SERAMIK

COVERINGS
2025
COLLECTION

Ceramic is today's one of the most modern and technological decoration materials and it was used since the beginning of the history.

The foundations of "Termal Seramik" were laid in Söğüt – Bilecik in 1995, which started to produce ceramics so that customers with different needs and wishes can create the spaces of their dreams by bringing technology, nature and people together. The annual production capacity of Termal Seramik, which started production in its first factory in 1997 and in its second factory in 2005, reached 28,000,000 m² with the commissioning of its new investment in December 2021.

New investments enabled Termal Seramik to produce Porcelain Floor Tiles of sizes such as 80×80, 60×60, 60×90, 40×80, 30×120, 60×120, 75×150; Wall Tiles of sizes such as 30×90, 30×75 and Parquet Porcelain Tiles of sizes such as 15×60, 15×90, 20×90, 30×120. Regular Porcelain Products of sizes such as 30×60, 45×45 and 33×33 and Wall Tiles of sizes such as 30×60, 10×20, 10×30, 10×40 are being produced as well. Our factory is capable of offering all these products in "rectified" and "non – rectified" solution. Color body and 20mm thick tile products are also offered to customers.

Employing around 1.300 people for production, Termal Seramik is running its production under strict Total Quality Assurance System with domestic and international certifications.

Our purpose and major objectives are to satisfy customer needs; to contribute to national economy; to fulfill our duties for the environment and the society; and to put Total Quality Assurance System into our top priority in order to become the leader in our sector and in continuous technological innovation.
